About Us

Founded in **2021**, **Polyanh Polymers and Industries Pvt. Ltd.** has emerged as a trusted manufacturer of high-quality silicone and rubber components. With our state-of-the-art factory located near Pune, we specialize in Silicone Rubber Tubings, Hose Pipes, Inflatable Seals, Door Gaskets, Molding Products, and customized rubber solutions for diverse industries.

At Polyanh, we operate under strict Pharma industry norms, ensuring every product meets global standards such as FDA 21 CFR, USP Class VI, and other regulatory requirements. Our product range includes specialized solutions like Hanfure, Hanflow, Hanfex tubings, HanFIT, HanVAC, HanVACFIT, HanWRAP, and HanFlexie hoses, each designed to cater to specific industrial needs including Pharma, Food, Electronics & Engineering, and Solar sectors

We also manufacture a wide range of Pharma & Medical Gaskets, Tri-Clover Gaskets, O-Rings, Washers, Butterfly Gaskets, Extruded Profiles, Moulded Items, Sieves & Screens, and Customized Components that are widely used across pharmaceutical, food processing, dairy, solar, engineering, and home appliance industries. Our solutions are designed with high temperature resistance, durability, and superior sealing ability, ensuring reliability and long life in critical applications.

Aim

To deliver high-quality silicone and rubber solutions that meet global standards and cater to diverse industrial needs.

Vision

To be a leading and trusted name in silicone and rubber manufacturing, known for innovation, reliability, and customer satisfaction across industries.

Mission

To design, develop, and supply customized, durable, and regulatory-compliant products while ensuring continuous improvement, sustainability, and value for our clients.

Our Products

Silicone Tubings

•**Hanfure** – High-quality, food-grade silicone tubing with extra smooth bore; ideal for pharma & biotech fluid transfer and peristaltic pump applications.

•**Hanflow** – General-purpose tubing for food & pharma industries; smooth bore finish for non-regulatory application

•**Hanfex** – Peroxide-based tubing, translucent and flexible; used for non-critical fluid transfer in peristaltic pumps, available in various colors.

Silicone Hoses

•**HanFIT** – Polyester-braided silicone hoses with excellent flexibility and minimal bending radius.

•**HanVAC** – Transparent, SS 316L wire-reinforced hoses; antistatic and suitable for vacuum applications in pharma.

•**HanWRAP** – High-pressure hoses reinforced with SS 316L wire and multi-layered polyester fabric wrapped in silicone.

•**HanVAC** – Transparent, SS 316L wire-reinforced hoses; antistatic and suitable for vacuum applications in pharma.

•**HanVACFIT** – Combination of polyester braiding & SS 316L wire; withstands both pressure and vacuum with high burst resistance.

•**HanFlexie** – PTFE-lined, SS-braided, silicone-coated hoses; highly chemical-resistant for high-pressure use.

Our Products

Gaskets & Seals

•**Tri-Clover Gaskets, Partition Gaskets, Hopper Gaskets**

•**O-Rings, Silicone Washers, D-Type Gaskets, Butterfly Gaskets**

•**Pharma & Medical Gaskets**

•**High-temperature and long-life gaskets for solar, dairy, and door applications**

Extruded & Moulded Components

Customized profiles in silicone, EPDM, nitrile, and sponge

Seals, plugs, caps, couplers, liners, diaphragms

Used in appliances like mixers, water coolers, RO units, refrigerators, and washing machines

Sieves & Screens

•**Shifter Sieves** – Silicone & static dissipative rubber; mesh sizes 4# to 400#, diameters 8" to 48".

•**FBD Sieves** – Mesh size 20–150 microns, diameters 8" to 48".

•**Cone Mill, Multi-Mill, Cadmill & Hammer Mill Screens** – SS 316L, perforation size 0.2 mm to 15 mm.

•**Oscillating Granulator Screens** – SS 316L, various perforation types.

•**Test Sieves & Filtration Pots** – GMP design, multiple sizes available.

Industries We Serve

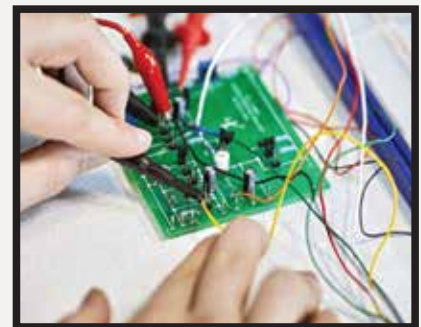

•Pharmaceutical & Biotech

Fluid transfer tubings, hoses, inflatable seals, and sterile gaskets.

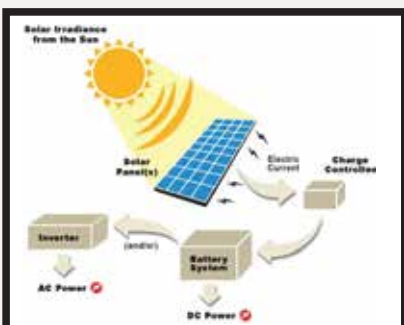

Food & Beverages

Food-grade tubings, gaskets, and sealing components for safe processing.

Electronics & Engineering

Specialized rubber components, extruded profiles, and insulation solutions.

Solar & Energy

High-temperature resistant gaskets and seals for solar applications.

Dairy Industry

Milking machine liners, gaskets, diaphragms, and hygienic seals.

Home Appliances

Rubber parts for mixers, refrigerators, water coolers, RO units, and washing machines.

SILICONE TUBINGS

At Polyanh Polymers and Industries Pvt. Ltd., we specialize in manufacturing a wide range of silicone tubings in dust-free, controlled environments, ensuring the highest quality and compliance with pharma industry norms. Our tubings are engineered for fluid transfer, insulation, and sealing applications across pharmaceutical, biotech, food, electronics, and engineering sectors.

Our Variants

Hanfure – Premium, food-grade tubing with ultra-smooth bore finish. Ideal for fluid transfer in Pharma & Biotech industries and widely used in peristaltic pumps.

Hanflow – General-purpose tubing with smooth bore finish, suitable for food & pharma applications under non-regulatory usage.

Hanfex – Peroxide-cured translucent tubing, highly flexible and cost-effective, used in non-critical applications and peristaltic pump operations. Available in multiple colors

Applications

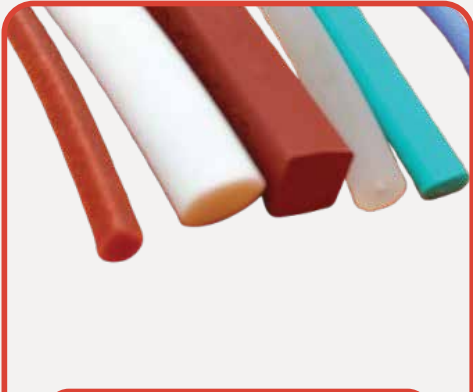

- ◆ Transfer of oral and sterile liquids
- ◆ Peristaltic pump-based fluid transfer
- ◆ Injection & vial filling machines
- ◆ Food & beverages processing
- ◆ Drug delivery systems & disposable medical use
- ◆ High-voltage insulation & gasketing

Key Features

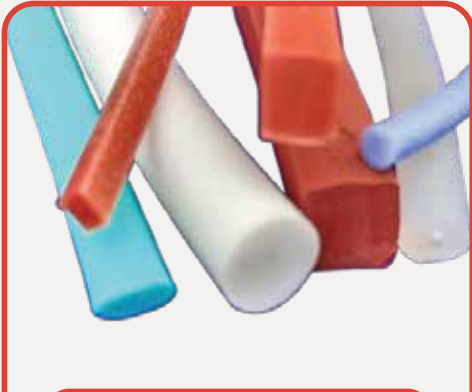

- ◆ Excellent heat resistance (–50°C to +230°C)
- ◆ FDA & USP Class VI compliant, food-grade quality
- ◆ Resistant to ozone, weather, chemicals, and body fluids
- ◆ Sterilisable, non-toxic, and odorless
- ◆ Smooth finish, leakage-proof, and flexible
- ◆ Available in transparent & colored options

SILICONE CORDS & STRIPS

We manufacture a wide range of silicone cords and strips designed for high-performance sealing and gasketing applications. Available in round, square, and sponge profiles, our cords and strips are produced with precision to deliver dimensional accuracy, durability, and flexibility across industries such as pharmaceutical, food, medical, and engineering.

Solid Silicone Cords

Silicone Sponge
Cords & Strips

Custom Profiles

Our Range

Solid Silicone Cords – Round & square sections, sizes ranging from **0.5 mm to 60 mm**.

Silicone Sponge Cords & Strips – Lightweight, flexible, and ideal for applications requiring resiliency and acoustic insulation.

Custom Profiles – Tailor-made cords and strips in different colors, sizes, and hardness levels (**10–40 Shore A**).

Applications

- ◆ Sealing and gasketing in harsh environments
- ◆ Bakery oven doors, autoclaves, and sterilizers
- ◆ Grooves of machined parts & pharmaceutical machinery
- ◆ Food and medical equipment
- ◆ Pipe bending and insulation
- ◆ Round O-rings & acoustic insulation

Key Features

- ◆ Excellent heat resistance (–50°C to +230°C)
- ◆ Resistant to ozone, weather, and chemicals
- ◆ FDA & RoHS compliant for safety and quality
- ◆ Odorless, non-toxic, and non-reactive
- ◆ Smooth finish, non-sticky, non-porous, and crack-resistant
- ◆ Good compression set, flexibility, and tensile strength

SILICONE EXTRUDED PROFILES

We manufacture a wide variety of silicone extruded profiles in customized shapes, sizes, and colors to meet diverse industrial requirements. Produced with precision engineering and consistent physical properties, our profiles are widely used in pharmaceutical, food, medical, engineering, and industrial applications.

Our Range

Over 500+ customized designs of extruded gaskets and seals

Available in pharma, food-grade, and medical-grade silicone

Offered in solid and sponge variants for different applications

Tailor-made profiles developed as per client requirements

Applications

- ◆ Clean room and freeze doors
- ◆ Autoclaves, ovens & dry heat sterilizers
- ◆ Pharma machinery & airtight door seals
- ◆ LED gaskets & textile machineries
- ◆ Modular room doors & windows
- ◆ Food processing & isolator systems

Key Features

- ◆ Excellent heat resistance (-50°C to $+230^{\circ}\text{C}$)
- ◆ Resistant to ozone, weather, and chemicals
- ◆ FDA and RoHS compliant for safety and hygiene
- ◆ Odorless, non-toxic, and non-reactive to body fluids
- ◆ Leak-proof, durable, and easy to install
- ◆ Available in multiple colors, hardness levels, and finishes

SILICONE INFLATABLE GASKETS

Our silicone inflatable gaskets are designed to provide reliable, leak-proof sealing solutions in demanding industrial environments. Manufactured from FDA-approved, high-strength transparent silicone rubber, these gaskets offer excellent flexibility, durability, and pressure-bearing capacity. They are widely used in pharmaceutical, food processing, medical, and engineering industries where hygiene and precision are critical.

Applications

- ◆ Fluid Bed Dryers (FBD) in pharmaceutical processes
- ◆ Powder and bulk solid handling systems
- ◆ Inflatable door and valve seals
- ◆ Conveyors & material handling machinery
- ◆ Medical sterilizers & oven door seals
- ◆ Food processing equipment
- ◆ Semiconductor and electronic wafer processing

Key Features

- ◆ Provides leak-proof closure with easy inflation and deflation
- ◆ Withstands up to 4 kg/cm² pressure with ±5% dimensional tolerance
- ◆ Not subjected to permanent compression set, ensuring long life
- ◆ Excellent heat resistance (-50°C to +230°C)
- ◆ Resistant to ozone, weather, and chemicals
- ◆ Smooth finish, easy installation, and customizable sizes
- ◆ Available with complete assembly for ready-to-use solutions

RUBBER O-RINGS

We manufacture and supply a wide range of Rubber O-Rings and Seals designed for precision sealing in both static and dynamic applications. Produced from high-quality elastomers, our O-Rings ensure leak-proof performance, durability, and chemical resistance, making them suitable for pharmaceutical, food, automotive, and engineering industries.

Material Options

- ◆ **Silicone**
- ◆ **Viton (FKM)**
- ◆ **Neoprene**
- ◆ **Nitrile (NBR)**
- ◆ **EPDM**
- ◆ **Natural Rubber**
- ◆ **Fluoro Silicone**

Applications

- ◆ **Pharma & food-grade sealing solutions**
- ◆ **Automotive and fuel system sealing**
- ◆ **High vacuum and pneumatic applications**
- ◆ **Filter housings & peristaltic pumps**
- ◆ **Aircraft & heavy engineering systems**
- ◆ **High-temperature & chemical-resistant environments**

Key Features

- ◆ **Excellent heat resistance (-50°C to +230°C)**
- ◆ **FDA & RoHS compliant materials available**
- ◆ **Superior resistance to ozone, weather, and chemicals**
- ◆ **High durability, crack-resistant, and long service life**
- ◆ **Available in standard and customized sizes (from 1 mm to 600 mm ID)**
- ◆ **Smooth finish, easy to fit and leakage-proof**

RUBBER GASKETS

We manufacture and supply a wide range of rubber gaskets engineered for leak-proof sealing, durability, and high performance across multiple industries. Designed to withstand pressure, temperature variations, and chemical exposure, our gaskets ensure reliable sealing solutions in pharmaceutical, food, engineering, dairy, solar, and industrial applications

Types of Gaskets We Offer

Flange Gaskets – Reliable sealing under high pressure in pipelines and equipment

Ring Gaskets – Compact sealing for critical joints

Butterfly Gaskets – Smooth, durable sealing for valves and pipelines.

Steel Insert Rubber Gaskets – Enhanced strength and stability for industrial use.

Customized Gaskets – Tailor-made in various sizes, shapes, and colors

Materials Available

- ♦ Silicone
- ♦ Viton (FKM)
- ♦ EPDM
- ♦ Nitrile (NBR)
- ♦ Neoprene
- ♦ Natural Rubber
- ♦ Hypalon
- ♦ Fluoro Silicone

Key Features

- ♦ Excellent temperature resistance (-50°C to $+230^{\circ}\text{C}$)
- ♦ High resistance to ozone, weathering, and chemicals
- ♦ Available in food-grade & non-food-grade variants
- ♦ Customizable in shapes, colors, and hardness levels
- ♦ Smooth surface finish with very low tolerances
- ♦ Long life and superior sealability under static conditions

Rubber Moulded Parts

We specialize in manufacturing precision rubber moulded parts that cater to a wide range of industrial and commercial applications. Designed with fine-grade elastomers, our moulded components offer excellent strength, temperature resistance, vibration absorption, and load-bearing capacity

Types of Gaskets We Offer

- Rubber Diaphragms** – Reliable sealing for pumps, valves, and actuators.
- Rubber Bellows** – Flexible protection against dust, vibration, and movement.
- Rubber Bushes & Mounts** – For shock absorption and noise reduction.
- Rubber Grommets & Corks** – Leak-proof, durable sealing solutions.
- Suction Cups & Stoppers** – For industrial and appliance use
- Customized Moulded Parts** – Tailor-made as per client designs and specifications.

Materials Available

- ◆ Silicone
- ◆ Viton (FKM)
- ◆ EPDM
- ◆ Nitrile (NBR)
- ◆ Neoprene
- ◆ Natural Rubber
- ◆ Hypalon
- ◆ Fluoro Silicone

Key Features

- ◆ Excellent temperature resistance (–50°C to +230°C)
- ◆ High resistance to ozone, weathering, and chemicals
- ◆ Available in food-grade & non-food-grade variants
- ◆ Customizable in shapes, colors, and hardness levels
- ◆ Smooth surface finish with very low tolerances
- ◆ Long life and superior sealability under static conditions
